

CONTENTS

Introduction	ix
Developing Disease Resistance and Regenerating Soil Health	1
<i>Michael McNeill</i>	
Suppressing Disease for Future Crops	21
<i>Don Huber</i>	
The Value of Regenerative Agriculture Management	47
<i>Jerry Hatfield</i>	
Indicators of Healthy Soil	63
<i>Robert Kremer</i>	
Working with Life Rather than Death	83
<i>Gabe Brown</i>	
Eliminating the Need for Synthetic Fertilizers	105
<i>Dr. Kris Nichols</i>	
Ecosystem Diversity Prevents Insect Pressure	123
<i>Dr. Jonathan Lundgren</i>	
Cultural Management for Organic Weed Control	143
<i>Klaas Martens</i>	
Concepts in Biological Farming	169
<i>Gary Zimmer</i>	
Insects: Nature's Garbage Collectors	185
<i>Tom Dykstra</i>	
Passionately Breeding for Health and Quality	211
<i>Ed Curry</i>	
Water and Nutrient Movement in Plants and Cells	227
<i>Dr. Gerald Pollack</i>	
Meeting the Demand for Nutrient-Dense Food	249
<i>Matt Kleinhenz</i>
